

# Science Fair

16/11/16

On Wednesday we had a Science Fair in the gym. I really loved the Science Fair because it was very interesting and enjoyable. I do have a suggestion for the future maybe have the younger classes go in the morning and in the afternoon have the seniors. Also I would have a short time for the junior and have longer for seniors.

I loved Sister Anne Marie's station because it was unique and different. Our station was very cool. I learned so many different types of Science and now I love Science.

Thank you to Ms. Nolan for running the Science Fair.

# School Science Fair 17/11/16.

1 I thought Mr Kelly's was the best experiment.

I like when he put the pencil through the bag.  
2 And when the water didn't spill out. Now that was good work just to do that.

The second experiment that I liked was Miss.  
3 O'Grady's one with the oranges which one can sink and which one can't sink so I picked

The one that can't sink with the skins on it.  
4 Colin picked the one that can sink so he was right and I was wrong. The 3rd one I liked was Miss Finnan's one with the basment with the  
Water in it and there was stuff there.

5 That you have to put into it and you have to see which one can float up and which one can stay up and I got it right everyone.

6 It was fun and fantastic and I really enjoyed it. I thought it was good fun.

# Science Fair Report

My favourite station was Mr. Kelly's because he did this thing with pencils and water and a bag. He put water in a bag and closed the bag up. Then got four pencils and put them through the bag. It was a great day and a great Science fair.

# Science Fair

17. 11. 16

I really enjoyed th science Fair.

It was great to see new things.

I liked Mr. Kelly's experiment the best. He had water in a bag and

Put Pencils through the bag. The

Water didn't even come out! I

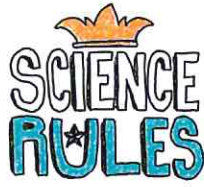

learned that Science is Fun! I

Would love another Science day!

## **Science Fair Report**

***Mikey and I were to host our class science experiment at the science fair. We were doing this experiment called "Find Your Dominant Eye!" there was a lot more people with a dominant right eye than left. The total for the right eye is 20 people. The total for the left eye is 17. Mikey's favourite science experiment was Mrs. Keating's class height measurement. My favourite science experiments were Mrs. Keating's height measurement and our own class one "Find Your Dominant Eye!" I had a great day at the science fair and enjoyed the science experiments and I can't wait until the next one because I learned a good bit!.***

***Report by Colm Kinsella 😊***

# School Science Fair

yesterday we had a science fair  
The whole school was there It was  
hour There were alot of different  
stations set up with experiments  
we really liked it It was good fun  
we learned new things Every one  
was taking to different  
people from different classes  
about the experiments. The buzz  
in the hall was mighty we  
cant wait again untill the  
next science day
